ABOUT US

Velose Traders specializes in the sale of sustainable, biodegradable, durable, compostable, and microwave-safe disposables. We have distribution centers worldwide in the following countries: United States, Australia, and Canada. We are proud to work with manufacturing partners who focus on resource and social sustainability.

FOUNDED

Founded in 2022, a team of six set out on a mission to make planet and budget-friendly disposables available to every household.

LEAF

Palm leaf plate production is a sustainable process which upcycles the leaves that would have been previously discarded. It provides an eco-friendly alternative to single-use plastic and common production methods are chemical free. Our products are made from fallen Areca palm leaves sourced from Southern India.

SUSTAINABLE

BIODEGRADABLE

DURABLE

COMPOSTABLE

MICROWAVE-SAFE

PROCESS

Our manufacturing partners create the products in facilities located in India. The facilities leverage the 5S principles to maintain a clean and orderly environment. The plates are made in seven step process which includes three cleaning phases, chemical free temperature molding, and quality checks at every stage of the process. Post-production, Velose Traders provides exemplary customer service for our distribution clients.
